DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1-6, drawn to an isolated molecular complex comprising a proteoglycan and a receptor for a myelin-derived-growth-inhibitory protein.
- Group II, claims 7-10, drawn to a method of modulating neurite outgrowth comprising contacting a neuron with SEQ ID NO: 1.
- Group III, claims 11-12, drawn to a method of treating a central nervous system disorder comprising administering SEQ ID NO: 1.
- Group IV, claims 13-14, drawn to a method of treating a central nervous system disorder comprising administering a domain with lectin activity.
- Group V, claim 15, drawn to a method of treating a central nervous system disorder comprising administering an agent that promotes or prevents sialic acid binding to a receptor for a myelin-derived-growth-inhibitory protein.
- Group VI, claims 16-21, drawn to an isolated molecular complex and a method of modulating neurite outgrowth comprising contacting a myelin-derived-growth-inhibitory protein with NgR1, NgR2, or NgR3.
- Group VII, claim 22, drawn to a method of identifying a compound.
- Group VIII, claims 23-29, drawn to a chimeric protein that comprises SEQ ID NO: 13 or SEQ ID NO: 19.
- Group IX, claims 30-35, drawn to a chimeric protein that comprises SEQ ID NO: 11 or SEQ ID NO: 17.
- Group X, claims 36-41 and 50-51, drawn to a chimeric protein that comprises SEQ ID NO: 15 or SEQ ID NO: 21 and methods of use thereof.
- Group XI, claims 42-45, drawn to a nucleic acid encoding a chimeric protein.
- Group XII, claims 46-49, drawn to a method of inhibiting MAG-NgR2 complex formation.
- Group XIII, claims 62-64, drawn to an isolated molecular complex comprising an isolated first and second receptor for a myelin-derived-growth-inhibitory protein.
- Group XIV, claims 65-74, drawn to an isolated molecular complex comprising a proteoglycan, an isolated receptor for a myelin-derived-growth-inhibitory protein and a FGF.
- 2. The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: claim 1 is anticipated by Strittmatter, US Patent Application Publication 2002/0012965 (31 January 2002). 2002/0012965 teaches a composition comprising a Nogo receptor and

Application/Control Number: 10/551,833

Art Unit: 1647

heparin, this teaching all of the limitations of claim 1. As such, the remaining claims lack the same or corresponding special technical feature and restriction is required. See 37 CFR 1.475 and MPEP 1850.

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Application/Control Number: 10/551,833 Page 4

Art Unit: 1647

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of

inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37

CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Cherie M. Woodward whose telephone number is (571) 272-3329. The examiner can

normally be reached on Monday - Friday 9:00am-5:30pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Manjunath N. Rao can be reached on (571) 272-0939. The fax phone number for the organization where

this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained

from either Private PAIR or Public PAIR. Status information for unpublished applications is available

through Private PAIR only. For more information about the PAIR system, see http://pair-

direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer

Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR

CANADA) or 571-272-1000.
